

Completion: April 2023
Size: N/A
Budget: N/A
Location: Los Angeles, California
This is a Non-commissioned project (unpaid work)

The project delves into the potential for reclaiming wasted or underused spaces resulting from freeway on-ramps and transforming them into vibrant and productive community areas. These spaces would serve to bridge different parts of isolated communities, fostering connectivity, and bolstering the well-being of residents through engaging urban farming experiences.
